

BookMyConsultation Frontend Project

Professional Project README & Test Evidence Document

Project Overview

This project is a React-based frontend application for the BookMyConsultation platform. The application allows patients to browse doctors, filter by speciality, view doctor details, book appointments, manage appointments, authenticate users, and submit ratings after consultations.

Technology Stack

- React JS
- Material UI
- REST APIs
- Java Spring Boot Backend
- MongoDB / JPA-backed persistence layer

Core Features

- User Registration
- User Login & Logout
- Doctor Listing
- Doctor Speciality Filter
- Doctor Details View
- Appointment Booking
- Appointment Management
- Appointment Rating
- Doctor Rating Updates
- Authentication-based Access Control

API Integration Summary

- GET /doctors
- GET /doctors/speciality
- GET /doctors/{id}
- GET /doctors/{doctorId}/timeSlots
- POST /appointments
- GET /appointments/users/{userId}
- POST /ratings
- POST /auth/login
- POST /users/register

Testing Summary

All primary user journeys were tested successfully including authentication, doctor discovery, speciality filtering, appointment booking, appointment retrieval, rating submission, and doctor rating updates.

Future Enhancements

- Appointment cancellation
- Doctor search
- Pagination and lazy loading
- Profile management
- Notifications and reminders
- Responsive mobile optimization
